## Pricing guide 01.03 Summer 2009

This guide is provided to give you a better idea of what it will cost to make a 3d print. Our pricing is based largely on the volume of material used to print your model. The height of the model does not determine the price: It's volume does.

Other factors that can add to the cost of a 3d print:

- expedited orders
- very small or delicate parts
- primer coating
- satin coating

**3" tall  
\$50**

**6" tall  
\$150**

**9" tall  
\$425**

**12" tall  
\$820**

**18" tall  
\$2400**
